

Engineered Overhead Bridge Cranes

Our crane manufacturing facility in Denver, Colorado fabricates overhead bridge cranes with spans up to 125 feet and capacities to 100-tons. We also design, supply, install and test a wide variety of hoists, runway systems, monorail systems, workstation cranes and jib cranes.

Bridge Cranes

We engineer and build custom solutions ranging from light-duty economical cranes up to very large capacity high-duty cycle cranes with welded plate-box girders spanning in excess of 100'-0".

Our work is done in full compliance with CMAA, NEC, OSHA, MSHA and ASME standards. We have extensive electrical capability as well as AWS certified welders. All of our cranes are completely assembled and no load tested prior to shipment from our facility. Each crane is laser leveled and aligned to ensure proper operation and lasting service.

Did you know?

Wazee Crane offers a full line of overhead material handling related services from manufacturing, service, modernizations, inspections, training, and turn-key engineering.

Hoists

Wazee Crane offers a full line of electric, manual, wire rope, chain, and lever type hoists. We represent all major manufacturers including: Yale/Shaw Box, R&M Materials Handling, Ace, Coffing, CM, Harrington, Acco, Stahl, Detroit, Saturn, Ingersoll Rand and more.

We have the expertise to configure and specify the correct type hoist for any lifting application. Let us put this expertise to use for you and your company.

24/7 service

In-House-Engineering

Wazee provides in-house-engineering and can also furnish PE (Professional Engineer) stamped drawings and calculations. All of our calculations are done using MathCAD or Excel, and all drawings are done in AutoCAD and/or SolidWorks. This reduces calculation time and increases productivity which saves our customers money.

Also, being electronic, the calculations and drawings may be e-mailed to further save time. This is an ideal solution for companies with fabrication capabilities but no in-house engineering or design firms not familiar with the nuances of the crane industry.
